SANITATION

Water and Sanitation

\$1.3 million

Do you come alive at the thought of promoting good health through clean water and sanitation?

By fully funding Water and Sanitation, you will give trafficked women and children access to life-saving clean water.

Your incredible gift will be directed toward constructing state-of-the-art water and sanitation facilities that will radically reduce waterborne diseases and holistically promote good health.

Construction will begin once funding targets have been reached—and your generosity will take us a critical step towards achieving this important goal.

Integrated throughout the design of The Pokhara Project are state-of-the-art water, sanitation and hygiene facilities for women and children to use.

Engineers will ensure fresh, clean drinking water is available throughout the buildings by creating a borehole and pump, tapping into the natural spring available at the site.

Safe drinking water can be transported and sold to the wider community and the proceeds used to support 3 Angels Nepal's self-sufficiency.

Clean, private sanitation facilities will feature in all buildings and there will be accessible toilet blocks and hand washing stations for the women and children.

A decentralised wastewater treatment system (DEWATS) will ensure appropriate management of wastewater (including sewerage) in an environmentally safe way. This passive wastewater treatment method is effective, affordable and low maintenance.

Alongside these features, The Pokhara Project will sit above the banks of the Seti River. Essential works to stabilise these banks, and therefore preserve the site long into the future, have already been completed.

This water and sanitation infrastructure will be central to restoring life, health and dignity to the women and children who desperately need it.

Thank you for considering fully funding Water and Sanitation. Your incredible generosity will provide women and children with access to life-giving clean water and hygienic sanitation facilities to help ensure good health and wellbeing.
